PRESS RELEASE

FOR IMMEDIATE RELEASE

Three New KAISER Hospitals Choose DISCO™- For ROI & RAC Fulfilment

July 2012 - Laguna Hills, CA

Data Distributing announces the implementation of DISCO™ Digital Secure Copy, an automated, digital solution for Medical Records and RAC Audit requests on CD, to be launched in three more Kaiser Hospitals.

“Kaiser Permanente is at the forefront of patient care and organizational excellence. They care deeply about protecting the privacy and integrity of patient information as well as HITECH ACT requirements on energy saving and green technology. We are pleased that another Kaiser facility has selected DISCO™ to help their network automate the Release of Information and RAC Audit process while continuing to meet their goals”, says Nancy Fisher, President and CEO of Data Distributing.

“Their facilities process a large amount of paper ROI’s and RAC audits, even with a fully implemented EMR. Now, they can send documentation requests to an automated DISCO™ system, and create encrypted CDs with the requested information, greatly decreasing staff time and costs. This also provides Kaiser with a better control over the whole ROI & RAC process, decreasing the possibility of human error in processing requests. Of course the cost savings on paper, copiers, couriers, etc will also be substantial”.

About DISCO™

DISCO™ is an intelligent, digital (ROI) chart copy solution that produces patient record copies on encrypted CDs for medical records departments whether they are EMR-based, paper-based, or a hybrid of both. DISCO™ can perform HL7 queries and retrieves patient information from the HIS or EMR, creating on-demand digital copies of either full charts or specific encounters, and burns the patient data to a Rimage Disc Publishing system. Encrypting software also protects the security of the data. Additionally, DISCO™ indelibly prints the appropriate patient data directly on the CD for easy identification and quick shipment. For additional information about DISCO™, please visit www.discomedical.com.

About Data Distributing

Founded in 1984, Data Distributing develops innovative, digital and DICOM solutions, along with integration and professional services, to a growing number of facilities, OEMs and channel partners worldwide.
