PRESS RELEASE

FOR IMMEDIATE RELEASE

## **VA chooses DISCO-Digital Secure Copy to eliminate paper based Release of Information!**

**September 30 2009 – Santa Cruz, CA -**

Data Distributing announces the first VA installation of DISCO-Digital Secure Copy an automated, digital, chart copy on CD solution, at the Veteran's Affairs Hospital in Bay Pines, Florida.

"We are very pleased that the VA has implemented DISCO and can consider itself a pioneer in digital Release of Information", says Nancy Fisher, President and CEO of Data Distributing. "The Bay Pines facility processed a very large amount of paper ROIs and not only wanted to dramatically reduce the cost of paper, toner, copier expense and manual operations, but also protect the privacy and integrity of patient information as it left the facility. DISCO was customized to work with their EMR system and automatically create copies on CD, thermally print the labels and password protect the information. DISCO can help the VA satisfy new HITECH ACT requirements as well as energy saving and green technology recommendations".

### **About DISCO**

DISCO is an intelligent, digital (ROI) chart copy solution that produces patient record copies on disc for medical records departments whether they are EMR-based, paper-based, or a hybrid of both. DISCO performs HL7 queries and retrieves patient information from the HIS or EMR, creating on-demand digital copies of either full charts or specific encounters, and burns the patient data to a Rimage Disc Publishing system. Unique software also protects the security of the data. Additionally, DISCO indelibly prints the appropriate patient data directly on the CD for easy identification and quick shipment. For additional information about DISCO, please visit [www.discomedical.com](http://www.discomedical.com).

### **About Data Distributing**

Founded in 1984, Data Distributing develops innovative, digital and DICOM solutions, along with integration and professional services, to a growing number of facilities, OEMs and channel partners worldwide. This international company, headquartered in California, creates solutions that are used by hundreds of leading medical centers.
